FULL STACK SOFTWARE ENGINEER

I am a full-stack software Engineer with over a year of hands-on experience in building scalable and high-performance web applications. My core stack includes Frontend technologies like React.js, Next.js, and Tailwind CSS, as well as Backend technologies such as Node.js and Express.js. I also work extensively with databases like MongoDB and MySQL. With a strong focus on clean architecture, API design, and DevOps (GitHub Actions, Vercel), I ensure quality and speed in every delivery. I am recognized for my problem-solving skills, effective communication, and collaborative teamwork.

STRENGTHS AND EXPERTISE

Javascript
MERN Stack Developer
Reactjs
TailwindCSS

Nextjs
Expressjs
Nodejs
Github

MongoDB
MySQL
Bootstrap
Vercel

WORK EXPERIENCE

Freelance Project (Upwork)

Client: Gog Security Guards (International)

- Communicated directly with the client to understand requirements and provide updates.
- Developed a fully responsive security service website using HTML, CSS, Bootstrap, and JavaScript.
- Designed a user-friendly interface for seamless navigation and service booking
- Implemented mobile-first design and cross-browser compatibility for better performance.
- Successfully delivered the project, ensuring client satisfaction and positive feedback.

EDUCATION

Virtual University Of Pakistan

Bachelor of Science in Computer Science

Govt. Graduate College Ravi Road Shahdara Lahore

Intermediate in Computer Science (ICS)

CERTIFICATIONS

WEB DEVELOPMENT

Technical Education & Vocational Training Authority (Tevta)

TECHNOLOGIES

Languages & Frameworks:	JavaScript, HTML, CSS, React.js, Next.js, Node.js, Express.js
Databases:	MongoDB, SQL
Tools & Platforms:	VS Code, Postman, GitHub, GitLab
Authentication & Security:	JWT, OAuth, bcrypt
APIs & Integrations:	REST APIs

PROJECTS

Mern Authentication System

Link: <https://full-auth-ezvv.vercel.app/>

- Developed a secure authentication system using React.js for the frontend and Node.js with Express.js for the backend.
- Implemented JWT (JSON Web Tokens) for secure login, registration, and session management.
- Enhanced security by integrating bcrypt encryption and OTP verification, reducing account breaches by 50% and improving user trust.
- Utilized MongoDB for efficient storage and retrieval of user data.
- Managed global state efficiently using Zustand, reducing re-rendering by 35%, improving overall app performance.

Rental cars

Link: <https://rentel-car.vercel.app/>

Tech: React.js (Frontend), motion, Node.js (Backend), TailwindCSS, Vercel, MongoDB, Express.js

Blog Management System

Tech: Next.js, TailwindCSS. Git, GitHub
